

The 5-Minute Warehouse Profit Spot-Check: Instantly Uncover Hidden Labor Savings

Even the best-run warehouses risk profit loss through invisible inefficiencies.

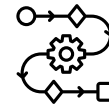

This quick self-check reveals the real cost of underutilized labor and shows where you are losing money today.

UNUTILIZED TIME

Is idle time like shift startup, shutdown, or waiting for tasks tracked in real time at the individual level?

Without visibility here, you're likely overlooking tens of thousands in recoverable labor. Cutting startup and shutdown delays alone can **save \$21K per month***.

INEFFICIENT MOVEMENT

Are pick paths and task assignments optimized using real-time data, or are workflows still mostly static?

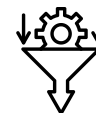

Outdated routes and static task flows quietly drain productivity. Fixing these gaps has saved teams **\$20K per month*** in reduced travel time and task delays.

OPERATIONAL ERRORS & REWORK

Is your team consistently tracking the root causes of mispicks and errors, or just correcting them after they happen?

Every mispick costs more than time. With labor, returns, and lost trust, the true cost ranges from \$40 to \$75 per error. CarParts.com achieved a **4x ROI in their first year** by tackling these issues head-on.

WORKLOAD IMBALANCE

How do you quickly spot who's overworked or underutilized before it affects throughput and goal attainment?

When labor isn't balanced, throughput stalls, morale suffers, and goals slip out of reach. Real-time visibility into workload distribution helps teams **recover \$40K monthly*** by reallocating effort where it's needed most.

*per a 200-person facility

If even one of the above area raises concern, there's likely untapped savings in your operation.

These inefficiencies are common - but they don't have to be costly.

Turn the page to see how real-time visibility with Takt helps teams **turn insights into action** and **boost profit margins**.

Your Path to Profit: From Spot-Check to Strategic Savings

You've identified where your warehouse might be leaking profit.
Now it's time to turn those insights into strategic gains.

Takt gives you real-time visibility, advanced analytics, and AI-powered insights to uncover hidden inefficiencies silently draining your labor budget.

We don't just surface the issues - we **quantify cost and guide your team toward smarter, more efficient operations.**

Why Operations Teams Trust Takt

VISIBILITY IN REAL-TIME

Takt pinpoints hidden inefficiencies like idle time, startup delays, and unbalanced workloads so you can take faster action.

FAST, MEASURABLE RESULTS THAT SCALE

Clients see over 10% performance gains in four weeks. That includes \$21K in monthly savings from faster startup and shutdown.

AI-GUIDED COACHING & DYNAMIC LABOR STANDARDS

AI-guided prompts and performance benchmarks help your team work more efficiently and improve shift performance every day.

COST BUFFER AGAINST EXTERNAL PRESSURES

Rising costs put pressure on your margins. Takt turns labor into a cost buffer without adding headcount.

Expand Your Optimization Ecosystem

Takt gives you full visibility and AI-powered improvement guidance, but maximizing warehouse performance also depends on smart integrations that boost efficiency and margin gains. That's why we partner with trusted systems that extend and enhance the value of our platform:

HARDWARE

Seamless integrations with handheld and wearable devices from partners like **Zebra Technologies** enable real-time tracking of indirect tasks, kitting, and value-added workflows.

RETURNS MANAGEMENT

Reverse logistics intelligence tools like **Two Boxes** help teams reclaim efficiency across restocking, returns and refurbishment flows.

WMS PARTNERS

Direct integrations with systems like **Deposco**, **Datex**, **Softeon**, and **Logiwa** create a unified data environment across your entire tech stack for smooth labor visibility.

AUTOMATION PARTNERS

Integrations with robotics platforms such as **AutoStore** align task assignments with labor metrics to improve throughput and provide end-to-end visibility.

LABOR OPTIMIZATION

Partnerships with leading continuous improvement companies such as **Cornerstone Edge**, **TAC Group**, **Jackpine**, and **Alpine** surface on-site improvement opportunities such as coaching, layout changes, and more.

Ready to turn visibility into action?

Schedule a **custom demo** and see how Takt drives **measurable labor ROI** →
